

2002 ENGINEERING EXCELLENCE AWARD

EXCELLENCE

ENGINEERING EXCELLENCE AWARD RECIPIENT

M i k e l H a r r y

Dr. Mikel Harry, founder and chief executive officer of the Six Sigma Academy, Inc. has been named the recipient of the ASU College of Engineering and Applied Sciences' Engineering Excellence Award. His influence as one of the original architects of Six Sigma has increased the quality of business for Fortune 500 corporations worldwide. Dr.

Harry began theorizing on the system while a Ph.D. student at ASU in the late 70's. The strategy grew while working with Bill Smith at Motorola under the guidance of Bob Galvin, former COB of Motorola.

The Six Sigma Academy was created to change the way executives view business. His methods have made major headway in engineering firms. The Six Sigma Academy boasts a veritable "who's who" of industry giants who utilize the strategy. He has personally trained and works with such CEO's as Jack Welch (GE), Jac Nassar (Ford), and Larry Bossidy (Allied Signal) as well as their senior executive teams and technical communities.

Remaining active in the coaching and training of corporate executives, Dr. Harry served as corporate vice president of Asea, Brown, Boveri, Ltd. He has co-authored several books. His most recent book is titled, Six Sigma: The Management Strategy Revolutionizing the World's Top Corporations.

Dr. Harry enjoys his "cowboy" roots and the thrill of racing cars. His extraordinary accomplishments within corporate America and his affinity for his alma mater, Arizona State University, has merited this honor as 2002 recipient of the Engineering Excellence Award.

2002
R E C I P I E N T

In recognition of

Dr. Mikel Harry
Engineering Excellence Award Recipient

Peter E. Crouch, Dean
College of Engineering and Applied Sciences
requests the pleasure of the company of
you and your guest for dinner on
Thursday, February twentieth, two thousand and three.
Cocktails at six p.m.
Dinner at seven-thirty p.m.
Four Seasons Hotel
10600 East Crescent Moon Drive
Scottsdale, Arizona

Black tie optional

This award program has been developed by the Arizona State University College of Engineering and Applied Sciences and the Engineering Alumni Chapter to recognize individuals for their notable contributions to engineering, the university, and society. The engineering field has numerous professionals who are changing the engineering profession and engineering education in remarkable ways. It is our desire to recognize these individuals for their superb achievements. Our continued success as an institution depends on the worthwhile efforts of these marvelous men and women. The first annual recipient in 1999 was Gary Tooker, former President and CEO of Motorola, followed in 2000 by Craig Barrett, President and CEO of Intel Corporation, and Pisuale Pistorio, President and CEO of STMicroelectronics, received the award in 2001.
